

17.24.050 Shared parking

17.24.050 – Shared parking

The same off-street parking spaces may be shared between two (2) or more separate uses on the same lot, but only to the extent that the demand for such spaces by the separate uses will not occur at the same hours during the same days of the week. No shared parking shall be approved unless the Director of Community Development makes a finding that the use of shared parking spaces will not occur at the same hours during the same days of the week, based upon the type of uses and their hours of operation.
