

17.26.010 – Purpose

Landscaping contributes to the health, safety and welfare of the City by enhancing its character and scenic beauty, providing clean air, reducing noise, preventing erosion of topsoil, reducing the rate of stormwater runoff, providing habitat for wildlife, conserving energy, and providing shade and windbreaks. Specifically, these regulations are intended to minimize the adverse impact of noise, dust, motor vehicle headlight glare or other artificial light intrusions, visual pollution and other objectionable impacts on public and private property. The use of native vegetation in managed landscapes, which is encouraged by this Chapter, may provide additional ecologic, economic, and aesthetic benefits. It provides wildlife habitat, reduces emissions from lawn mowing, reduces the use of chemical pesticides, herbicides, and fertilizers, provides enhanced erosion control and stormwater infiltration, and improves water quality.
